Item number: 850202
Product designation: Washed sand with a high content of quartz

Dansand®0-2 mm Rewashed Class E

Cost-effective top dress

Description

DANSAND® 0-2 mm Re-washed class E is particularly suitable for top dressing of fairways. The product is based on washed sand with a high quartz content and is free of clay, fines and organic material. Supply of DANSAND® 0-2 mm Re-washed class E will improve the structure of the soil profile, provide higher permeability and improve the growth conditions of the plants. The product prevents the formation wet areas on fairways making the golf season longer. It is also an economically attractive solution.

BENEFITS OF DANSAND® 0-2 MM CLASS E

- Washed sand with high silica content
- Good grain curve
- Economically attractive top dressing solution
- prevents the formation wet areas on fairways making the golf season longer
